Sales by Product Family

Sales by Customer Type

Sales by Region

Over time organizations grow, processes change, new tools are added, acquisitions occur and the data needed to drive the business comes from several different sources, in multiple formats, and it often needs to be manually manipulated and cleansed before any sense can be made of it. These time-consuming, manual processes lead to errors especially when reporting requirements change. With many disparate systems and manual processes, managers don't have access to the information they need when they need it. With Q4bis – you can deliver on the fly, near real time access to the data that is driving your business in measures that make sense for your industry!

“For the first time since 1983 we can clearly identify what is driving our business.”
Paul Martin, Golden Bay Cement

“PST's Q4Bis Analysis Software Saves Us Over \$500,000 Per Year In Wastage Alone!”
Dennis Jones, CEO, Burger King N.Z.

Why Q4bis?

It Can Integrate With Existing Data Warehouse

It Is 100% Citrix Compliant

It Provides a Consistent, Simple, Understandable Interface

Its' Data Is Available To Any Third Party Reporting Tool
